

Welcome to the Comfort Standard (Etrusco T 6900SB – T 6.9SF – T 6.9SB)

Welcome aboard! We are thrilled that you've chosen Indie Campers for your road trip. Your motorhome is equipped and designed to combine the freedom of the road with the comforts of home. Whether you are a first-time explorer or an experienced camper, our Etrusco is your ticket to creating lasting memories. Your adventure starts right here.

In our instructional video, you'll find detailed information about all the features and appliances. Be sure to watch it before your trip to make the most of your experience!

Etrusco Instructional Video

About this Guide

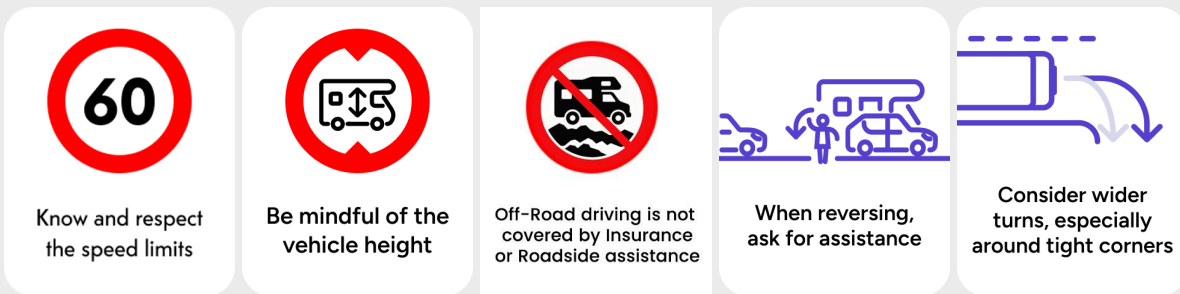

This guide is here to support you, from getting to know the basics of your camper to assisting you in case you need to understand equipment specificities during your trip.

01	<u>Before you Pick-up:</u> For driving tips, overnight parking, and short safety checks.
02	<u>Motorhome Essentials:</u> Must-read information about your camper.
03	<u>Discover and Explore the Features:</u> Navigate the Etrusco floor plan. Click on any feature for detailed instructions and access to troubleshooting tips. Each step includes an instructional video for clear and easy understanding.
04	<u>Feature Assistance:</u> Click here for assistance with any issue.
05	<u>Before you Drop-off:</u> Remind yourself of the maintenance rules before returning your Etrusco.
06	<u>Support Contacts:</u> Access our on-trip support contacts for further assistance.

 Remember to ask your local depot team about the **tolls policy** 

Before your Pick-up

Before you set off, take a moment to familiarise yourself with the essentials of a motorhome while driving:

*speed/size are indicative; ask the local team for advice

Overnight Parking 🏕️

Overnight parking rules differ by country, so it's important to understand the regulations for your destination. It is advisable to always use designated areas such as campsites, as these are equipped with most motorhome necessities such as waste disposal and battery charging.

Check out our [blog post](#) for some of the Apps we recommend to help you find the best spot for the night.

Safety Checks ⚠️

Go over our main safety guidelines for the Etrusco, designed to prioritize your safety on the road. For sustainability and environmental safety protocols, read our Help Center [article](#).

- ✓ Ensure [gas cylinder valves](#) and [kitchen gas valves](#) are turned off 🚫 before driving.
- ✓ Ensure all [side](#) and [roof](#) 🚫 windows are securely closed before driving.
- ✓ Remember to disconnect the [220 Volt power cable](#) 🚫 connection before driving.
- ✓ Turn off the stove immediately after use.
- ✓ Check all drawers, doors, and cabinets are properly closed before driving.
- ✓ Pack your luggage to secure it before driving.

Motorhome Essentials to Know

A motorhome has many exciting features, but they need to be used properly. This section will prepare you to take advantage of them:

Driving a motorhome

If you are searching for a house-like camper, Etrusco is a great choice, but you must exercise extra caution while driving to avoid any incidents. Make sure you are familiar with the height and length of the vehicle and have somebody helping when reversing or parking due to the extra length after the turning point.

Water and Fuel

Depending on the days travelled and distance covered, you will need to refuel your motorhome and fill up the water tank.

⚠ Take special attention to the dedicated filling locations for Water / Fuel ⚠

WATER

Located in the rear of the motorhome

FUEL - DIESEL & ADBLUE

Located in the driver's door

⚠ ADBLUE ⚠

Located in the driver door.
Lower blue small cap

Battery and Appliance Use

- A motorhome works like your mobile phone: It has a Leisure Battery that sustains the use of your appliances. The more appliances you use, the more often you need to charge it.
- While you are driving, the Leisure Battery is charging. Depending on the distance you travel and the motor RPMs, the Leisure Battery will receive charge from the Engine. Nevertheless, recharging your Leisure Battery using the 220V cable is recommended every two nights.
- Learn how to charge your battery by connecting to an external power source .
- Do not forget to disconnect the power cable before driving.
- The 220V plugs  inside of the motorhome can only be used when the vehicle is stopped and connected to an external power source.
- Note: At very low temperatures, the Leisure Battery capacity decreases further.

Electricity, Water and Heating System Management

This motorhome has electricity, water, and heating systems managed through control panels located above the van's sliding door

Water System Operation

- The Water and Electricity Control Panel manages the level of water and battery. Learn how to use the water and electricity control panel .
- The motorhome uses fresh water for your bathroom and kitchen. Always check the water level  and when it's time, fill up the fresh water tank .
- In order to use the water, you need to activate the water pump  on the control panel.
- The used water is stored in a grey water tank. Keep an eye on the grey water tank level  and when full, it needs to be disposed  in campsite or service area.

Heating System Operation

- The Heating Control Panel (*Truma*) manages the heating and hot water. It requires gas to work, so you will need a compatible gas bottle if you are going to use heating or hot water (*can be purchased at check-in and pick-up*). Learn how to use the [heating control panel](#) 📖.
- The gas cylinder must be connected and the gas valves properly open (instructions vary by country: [Germany](#) | [Italy](#) | [Italian w/ german adaptor](#) | [Portugal](#) 🧑🏻)
- All windows inside the motorhome must be closed for the heating system to be on.
- Make sure the [hot air vent ducts](#) 🧑🏻 are not covered or obstructed with any object/luggage/cloths to operate the air heater.

Fridge Power Settings

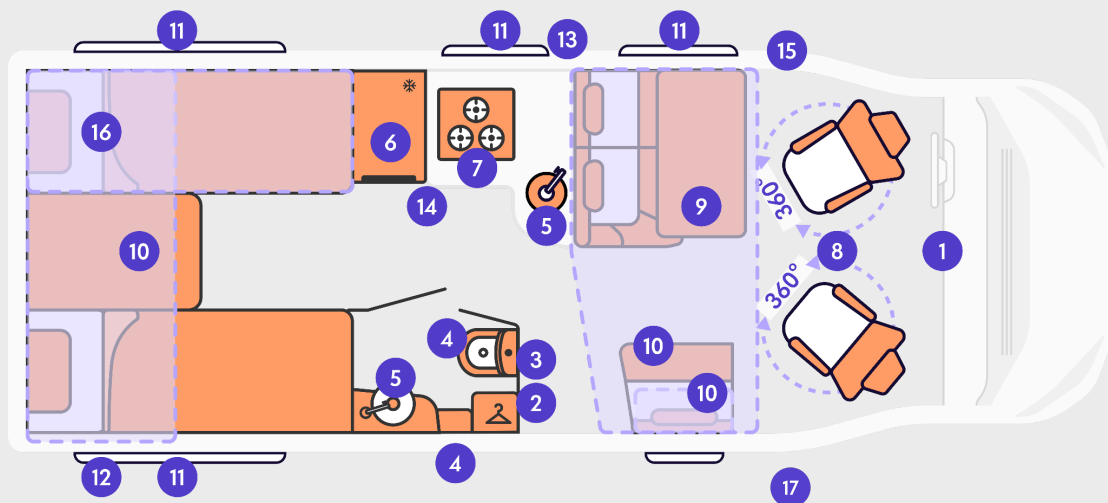

- The fridge inside the van is powered from the 12 Volt Leisure battery when driving, and 220 Volt when [connected with cable](#) 🧑🏻 to campsite or service area.
- When driving, in 12 Volt mode the fridge will only maintain the temperature that was achieved when connected to 220 Volt, do not expect a significant decrease in temperature if the vehicle is not plugged in a 220 Volt source regularly.
- Learn how to turn on/off the [fridge](#) 🧑🏻. There is a knob inside the fridge to turn it on and off and regulate the temperature.
- Manage the motorhome's battery consumption by adjusting the power level inside the fridge with [these](#) 📖 recommendations.

⚠️ The fridge will still work when the Water and Electricity control panel is Off. Make sure to turn it off in the fridge control knob when not in use and before dropping off the van.

In case you do not find what you need in the list above, please reach out to the respective [feature section](#) 📖 in this guide.

Discover the Etrusco

Navigate the floor plan by clicking on any feature to discover how to use it and resolve issues as they arise.

Feature Section

1 Cockpit

Just like a regular car cockpit 🧑, in your motorhome, you'll find a range of features, such as:

- USB plugs to charge your devices while driving;
- Radio with AUX and USB connectivity to enjoy your favourite road trip songs (no Bluetooth, just cable);
- Phone holder 🧑 for your convenience while driving,
- A/C to cool or heat up the cockpit area,
- Manual and Automatic gear.

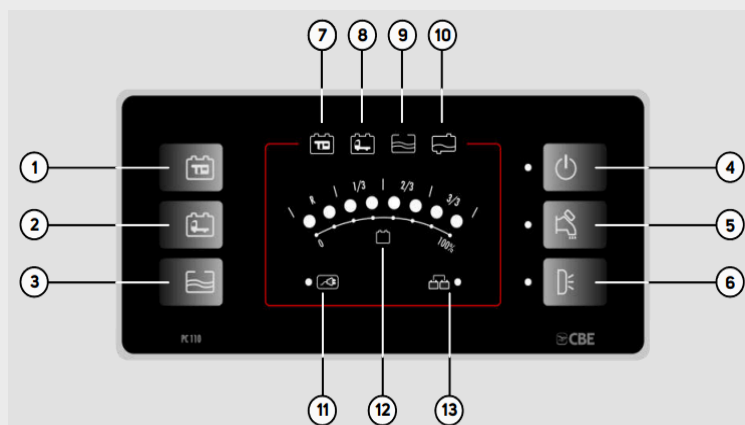

Learn how to use the Handbrake 🧑.

FAQs & Troubleshooting Guide 🔧

Question/Issue	What to do
How do I set the cruise control?	Activate the constant speed regulator by following these instructions: - Ford Transit <u>manual</u> 📖 / <u>video</u> 🧑. - Fiat Ducato <u>manual</u> 📖
How do the car keys work?	You can use the car keys to lock and unlock the cockpit doors: using the buttons or manually, by inserting the key in the door.
I have a warning light in my dashboard	Please check our dashboard warning lights troubleshooting: - Ford Transit chassis <u>here</u> 📖. - Fiat Ducato chassis <u>here</u> 📖.
12V Sockets or USB ports are not working in the cockpit	- Check if the car key is in the ignition and turned ON. - Test a different port to check if the charging cable is damaged.

2 Water & Electricity Panel

[View electricity panel manual](#) 📖

1. Leisure Battery status
2. Engine Battery status
3. Fresh Water Tank status
4. Panel Turn ON/OFF
5. Water Pump ON/OFF
6. Awning Light (*some models only)
7. Blinks for Low Leisure Battery
8. Blinks for Low Engine Battery
9. Blinks for Empty Water Tank
10. Blinks for Full Waste Tank
11. 220v is connected/charging
12. LED display
13. Leisure Battery charging through engine

This control panel enables you to:

- Turn on the Electricity inside the van (using leisure battery or plugged to land).
- Turn on the Water pump for your kitchen / bathroom tap and toilet flushing.
- Check water levels.
- Check the battery levels.

Learn how to use the [water and electricity control panel](#) 🧑, located near the van's sliding door.

FAQs & Troubleshooting Guide

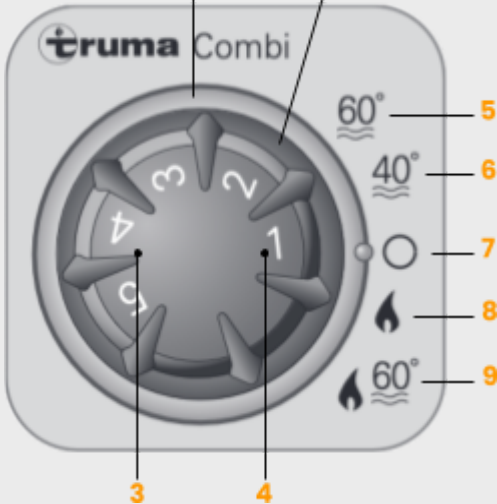

Question/Issue	What to do
How do I know when to charge the battery or fill the water tank?	<u>Check</u>  colour indications in the control panel for battery and water levels. Note that the battery requires <u>charging</u>  approximately every two days.
Does the leisure battery charge by driving the car?	- While you are driving, the Leisure Battery is charging. Depending on the distance you travel and the motor RPMs, the Leisure Battery will receive charge from the Engine. Nevertheless, <u>recharging your Leisure Battery using the 220V cable is recommended every two nights.</u>
The van is connected to external power. How do I know it's charging?	1. Check that the <u>exterior connection</u>  is properly plugged in. 2. In the control panel, a <u>220V charging symbol light</u>  will indicate that it is correctly charging (11). 3. If the charging light is not ON, check the power source or try a different one. 4. Check <u>here</u> if the <u>circuit breakers</u>  switches are all in the ON position.
My taps are not working - What should I do?	1. <u>Check</u>  battery levels on the control panel. 2. If the battery is low, connect to an <u>external power supply</u> . 3. Ensure the water tank has water by <u>checking</u>  on the panel. 4. <u>Turn on the water pump</u>  in the control panel. 5. If you are in cold temperatures, check if the <u>Anti Frost System</u>  is activated and if the fresh water tank or water hoses are not frozen.
The Grey water tank light is ON but no water comes when I open the valve - What should I do?	- Check the <u>Waste Water tank Feature Section</u> .

3 Heating System Control Panel

This control panel enables you to activate hot water and heating 🧑🏻 for cozy showers and to warm up your van, ensuring full comfort during your adventure. This control panel is located near the van's side door.

Hot Water and Heating - View Manual 📖

Truma CP CLASSIC panel

The diagram shows a circular control panel with a central knob (1) and an outer ring (2). The outer ring has positions for 60°C (5), 40°C (6), and 60°C (9). There are also positions for a yellow LED (3), a red LED (4), and a green LED (7). The panel is labeled 'Truma Combi'.

1. Outer control knob for Heating Mode
2. Inner control knob for Temperature (1 – 5)
3. Yellow LED lit, "Boiler heat-up phase"
Yellow LED flashing "Warning"
Red LED lit, red LED flashing "Fault"
4. Green LED lit, "On"
5. Hot Water mode – temperature 60 °C
6. Hot Water mode – temperature 40 °C
7. Rotary switch "Off"
8. Air Heating mode
9. Air Heating and Hot Water mode

Watch video tutorial 🧑🏻 / **View manual** 📖

Error codes list: Gas model 📖

Initial Conditions to operate Hot Water and Heating:

To operate the air heating, you need to ensure the following:

- Gas bottle with gas available (purchased at check-in or pick-up).
- The gas cylinder must be connected 🧑🏻 and the gas valves properly open 🧑🏻:
 - instructions vary by country: Germany | Italy | Italy with german adaptor | Portugal 🧑🏻

Comfort Standard Guide [Etrusco T 6900SB - T 6.9SF - T 6.9SB]

To operate the water heating, you need to ensure the following:

- Check if the electricity panel and water pump are ON 🧑‍🔧.
- All the above conditions for air heating regarding gas.
- Make sure you have filled up the water tank 🧑‍🔧.
- Check water level 🧑‍🔧 in the Water & Electricity control panel.

FAQs & Troubleshooting Guide 🛠️

Question/Issue	What to do
My Hot Water and Heating are not working. What should I do?	1. Ensure <u>initial conditions to operate</u> 📖 2. Check the instructional videos on how to operate the device. 3. It takes around 20m for the water to warm up.
My Hot Water/Heating control panel is blinking.	On your heating control 📖, check the <u>error codes</u> 📖 list to find the correct solution.
My heating doesn't work, and I have done all the troubleshooting steps provided. What should I do?	1. Check if <u>gas valves in the kitchen</u> 🧑‍🔧 area are open. 2. If closed, open the gas valves. 3. Check the gas burners for flame to ensure gas is available.
There is still an error display on the panel after the Trouble shooting	The issue must be manually resetted: 1. Turn the Outer control knob for Heating Mode (1) to the Off Position (7). Wait around 3min and try again.

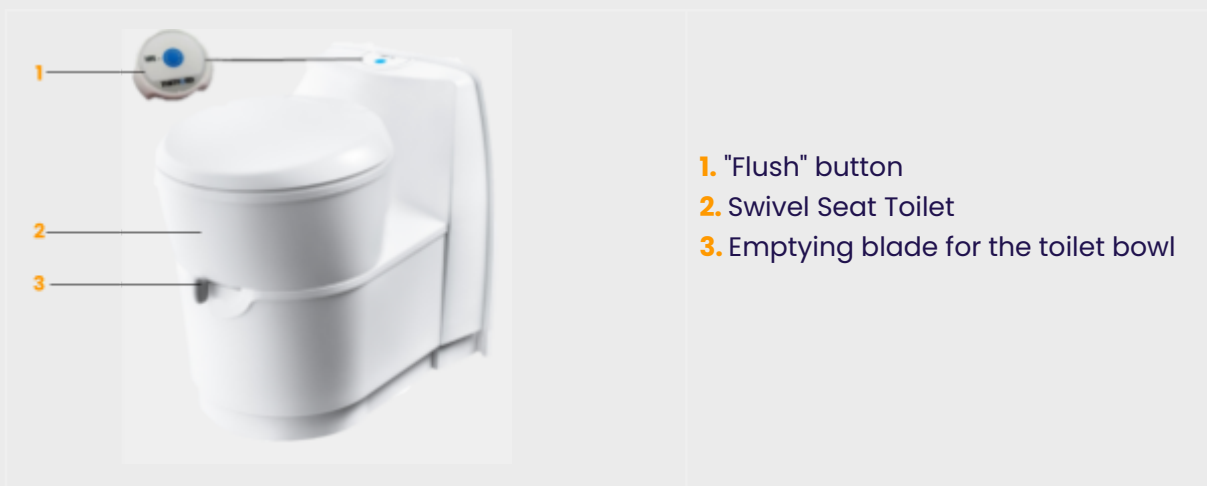

4

Bathroom with Toilet + Toilet Cassette

Toilet – View Manual

The bathroom in your motorhome includes a fully integrated toilet .

The toilet cassette tank must be emptied  regularly during your trip and before drop-off. Every time you empty the toilet cassette tank, you should add a new chemical tab  to the waste tank.

Initial Conditions to operate the Toilet:

Before using the toilet:

- Turn on the water pump  in the control panel.
- Rotate the Seat Toilet (2).
- Make sure the waste toilet cassette tank  is installed and open the emptying blade (3) .

After using the toilet:

- Use the flush button (1) to pour some water into the waste toilet cassette tank.
-  Do not throw toilet paper inside the toilet – it will clog the waste toilet cassette tank – use a separate trash bag for the toilet paper.
- Close the emptying blade (3) if not in use and while driving.

 Please note that waste (toilet cassette) disposal can only be done in designated areas such as campsites and service areas. 

FAQs & Troubleshooting Guide

Question/Issue	What to do
Waste toilet cassette tank cannot be removed. What should I do?	Check if the toilet <u>emptying blade</u>  is fully closed.
Waste toilet cassette tank level indicator not working. What should I do?	Empty the toilet cassette and make sure to rinse it well with water to clean the interior mechanism.
Toilet water does not flush	Turn on the <u>water pump</u>  in the control panel. Check <u>water level</u>  in the Water & Electricity control panel.

5 Taps: Shower, Washing Basin and Kitchen Sink

The Etrusco model includes 3 taps:

- Bathroom: shower and washing basin .
- Kitchen: sink .

Initial Conditions to operate all the taps:

Before using the **tap**:

- Turn on the water pump  in the control panel.
- Make sure you turn on the hot water, following your Initial Conditions to operate .

After using the **tap**:

- Empty the grey water tank  regularly or if you have the "tank full" display light ON/blinking.
- Remember: for the kitchen sink glass, close it before driving.

 Please note that waste (grey water) disposal can only be done in designated areas, such as campsites and service areas. 

FAQs & Troubleshooting Guide

Question/Issue	What to do
I don't have running water in my kitchen tap or bathroom shower. What should I do?	1. Ensure the water tank has water by <u>checking</u>  on the panel. 2. <u>Turn on the water pump</u>  in the control panel.
I have filled up the water tank and turned the water pump on, but I still don't have running water. What should I do?	1. The water pipes might have caught air. <u>Turn on the water pump</u>  and begin opening the faucets one at a time. Let it run for a few minutes to pressurise the system and let the water run until all the air has been released from the pipes; 2. If you are in a cold environment, make sure that the water or pipes are not frozen.
Water is leaking under the vehicle - What should I do?	Please ensure to check that the Anti Frost <u>drain valve is closed</u>  .
Water behind shower wall	Make sure the sink tap is closed and the handle is not facing the wall shower divider when you close it. It might accidentally activate the water tap.
Grey water tank level indicator is not working. What should I do?	Empty the grey water tank and make sure to rinse it well with water to clean the interior mechanism.

6 Fridge

When turned ON, the fridge in your motorhome will keep your food and beverages fresh throughout your journey.

 The fridge will still work when the Water and Electricity control panel is off. 

Make sure to turn it off in the fridge control panel when not in use and before dropping off the van.

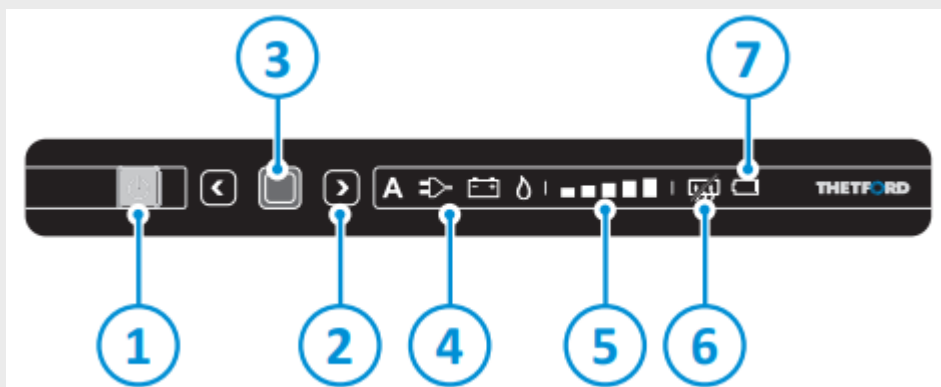

The cooling performance and power consumption of the fridge, can be affected by:

- The ambient temperature.
- Ventilation.
- The amount of food to be conserved.
- Duration of the door opening.
- Battery low voltage protection

Etrusco motorhomes are equipped with one of these fridge models, please identify them by checking the control panel image below:

Thetford N400 fridge

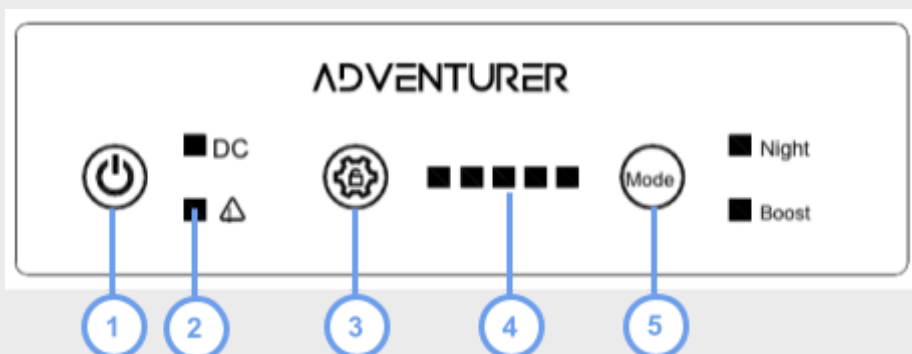

Fridge – View Manual 

1. Fridge turn ON/OFF
2. Arrow buttons
3. Confirmation Buttons
4. Energy Sources (220v, 12V or Gas)
5. Cooling level indicators
6. Anti-condensation
7. Battery Error code

Dellcool CVB3 fridge

Fridge – View Manual 

1. Fridge turn ON/OFF
2. ERROR light
3. Temperature setting
4. Cooling level indicators
5. Operation mode

How to operate the Thetford N400 fridge

The fridge is powered by:

-  **(Leisure) 12V Battery** = while driving:
 - The fridge will only maintain the temperature that was achieved when connected to 220 Volt or in Gas mode. Do not expect a significant further decrease in temperature if the vehicle is not plugged in a 220 Volt source regularly or operating in the Gas mode.
-  **220 Volt** when connected to an external power supply :
 - Campsite or service area.
-  **Gas** when parked and not connected to an external power supply:
 - Wild camping.
- **A Automatic** mode:
 - Automatically selects the **best mode**.

Learn how to Turn on/off the fridge :

- There is a panel on the fridge to turn it ON and OFF, choose the mode and regulate the temperature.
- Manage the motorhome's battery consumption by adjusting the power level inside the fridge with these  recommendations.

FAQs & Troubleshooting Guide - Thetford N400 fridge

Question/Issue	What to do
How should I operate the fridge to manage battery consumption?	1. Use 220V mode when plugged in the campsite to the mains electricity system: Set it to <u>maximum</u> power. 2. Use battery mode only when driving: Set to <u>medium</u> power. 3. Use Gas mode (if available) when wild camping and not plugged: Set to <u>minimum</u> power.
The fridge is not turning on - What should I do?	Your van has probably run out of battery or reached a low level. Charge the 12V battery by connecting the van to an <u>external power supply</u>  .
The fridge seems to be on, but it's not	In the 12 Volt mode, the fridge will only maintain the temperature that was achieved when connected to 220 Volt/Gas mode.

getting cool – What should I do?	Also, depending on exterior temperatures, especially in summer, it takes longer to reach colder temperatures. To accelerate this: 1. Connect the van to an <u>external power supply</u>  with the cable found in the van. - Set the fridge at <u>maximum</u> power. 2. If the fridge is working on gas, check the <u>gas connection</u> .
The fridge started smelling during the trip	Ensure all food or liquids are properly stored and closed inside the fridge.

How to operate the Dellcool CVB3 fridge

The fridge is powered by:

-  **(Leisure) 12V Battery** = while driving or wild camping. Your motorhome is equipped with solar panels to help charge the batteries
-  **220 Volt** when connected to an external power supply :
 - Campsite or service area.

Operation modes (5.) :

- **Night:** The fan operates at low speed and the compressor speed is limited, to reduce noise.
- **Boost:** The compressor operates at a preset high speed and the fridge gets rapid cooling.

Fault errors (2.) :

If a fault occurs, the  error lamp flashes will represent different error type:

 x 1 flash	Voltage failure	Low battery – Please connect to an <u>external power supply</u> 
 x 3 flashes	Starting fault	Power off the fridge for 10 minutes
 x 5 flashes	Temperature failure	High exterior temperature – Keep ventilation or reduce the ambient temperature

7 Stove

In the kitchen area you will find a gas stove 🧑 with three burners to cook your meals on the go.

For the stove to work, you will need to:

1. Connect and turn on the gas cylinder 🧑.
2. Turn on the Water & Electricity Control Panel 🧑.
3. Turn on the valves under the stove 🧑.
4. Turn on the stove 🧑.
5. Remember: after cooking, leave the glass up to cool down the stove and close it before driving.

FAQs & Troubleshooting Guide 🔧

Question/Issue	What to do
The stove doesn't turn on but the spark ignition is working (<i>I hear the sound when I press the button down</i>)	1. Ensure the <u>gas connection</u> 🧑 is open by opening the gas cylinder valve. 2. If the issue persists, <u>replace the gas cylinder</u> 🧑. 3. If the issue persists, press the gas knob for 30 seconds to 1 minute to release air and ignite flame.
The stove doesn't turn on, and the spark ignition isn't working (<i>I don't hear a sound when I press the button down</i>)	1. <u>Turn on the electricity</u> 🧑 on the control Panel before trying again; 2. Follow the previous steps <u>above</u> 📖. 3. If the issue persists, use a lighter to ignite the flame.

8 Seating Area

Both driving seats in your motorhome enhance the living space by effortlessly rotating 🧑🏻 to lounging set up, offering additional seating and comfort for extra living space.

If 5 people are traveling, there is a fifth seat that must be assembled 🧑🏻 to ensure a safe trip.

9 Dining Table

The dining table is easily found in the living area. Whether you're enjoying a meal, planning your next adventure or needing extra room inside, this space adapts to your needs. Also, this dining table can be easily converted to a single bed - please check the following chapter for more information.

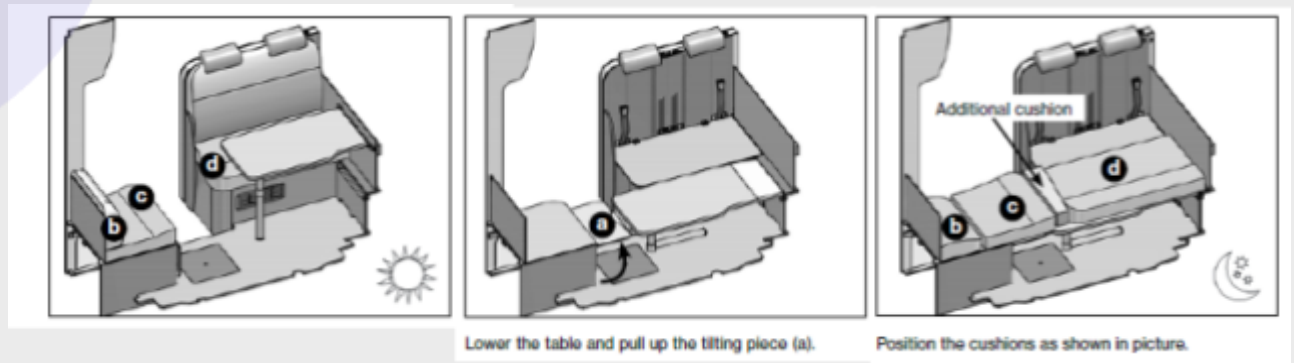

10 Sleeping Area

The Etrusco has two double beds and one single bed.

- To use the fixed double bed 🧑🏻 in the rear, you just need to pull the drawer and put the last piece of your mattress in place. Use the small ladder 🧑🏻 to climb up easily.
- To use the second double bed, you just need to pull the unlock lever and pull down the bed that is located above the dining area. Don't forget to remove the headrests and push the front seats forward enough for the bed to be lowered effortlessly. Use the big ladder 🧑🏻 to climb up easily. Additionally, you will find the ladder in the storage area.

- To use the convertible dinette bed, the dining area converts into a single bed follow this steps:

11 Windows

The Etrusco has several windows.

Learn how to open/close the [side windows](#) 🧑🏻 and [skylight window](#) 🧑🏻.

Learn how to use dining/sleeping areas [mosquito net](#) 🧑🏻 and [blinders](#) 🧑🏻 that can be pulled down during the night.

FAQs & Troubleshooting Guide 🔧

Question/Issue	What to do
My blinder does not remain closed - What should I do?	All around the van, you will find slide-down blinds. The plastic pieces on the side of the blinder fall easily, and sometimes they remain in the bottom part of the blinder's rail. Learn 🧑🏻 how to fix this issue.

12 Fresh Water Tank

The motorhome uses fresh water for your bathroom and kitchen. Always check the water level 🧑🏻 and when it's time, fill up the fresh water tank 🧑🏻.

The Water level can be managed in the Water and Electricity Control Panel. Learn how to use the Water and Electricity control panel 🧑🏻.

13 Waste Water Tank

The water you consume through the shower and kitchen tap is stored in the waste/grey water tank. To prevent smell and overflow, keep an eye on the grey water tank level, and when full, it needs to be disposed 🧑🏻 in the campsite or service area.

⚠ Please note that waste (grey water) disposal can only be done in designated areas, such as campsites and service areas. ⚠

FAQs & Troubleshooting Guide 🔧

Question/Issue	What to do
How do I know when to empty the waste water tank?	- In the <u>water and electricity control panel</u> 🧑🏻, a red light will blink in the icon of the waste water tank (when is 100% full).
I opened the waste water tank, but nothing came out	1. Check if the drain valve is in <u>OPEN position</u> 🧑🏻. 2. If no water comes out, there may be hair or debris around the probe inside the tank. Close the valve and let the tank fill up again for the light to go OFF. 3. If the temperature is very low, the waste water tank or water pipes could be frozen.

14 Plugs

Discover convenient charging inside your Etrusco with 12V, USB and 220V plugs 🧑🏻.

- To power up the 220V sockets, simply connect the van to an external power source 🧑🏻 at campsites and service areas and turn on the Water and Electricity control panel 🧑🏻.
- The Leisure battery of your motorhome supports 12V and USB charging without external power. You just need to make sure you have enough battery and that the turn on the Water and Electricity control panel 🧑🏻 is ON.

12V

USB

220V

FAQs & Troubleshooting Guide 🔧

Question/Issue	What to do
The sockets/plugs are not working. What should I do?	1. <u>Check</u> 🧑🏻 battery level on the control panel. 2. If the Leisure battery is low or you need to use 220V sockets, you must <u>connect the van to the power supply</u> 🧑🏻.

15 Fuel Tank & Adblue Tank

Your Etrusco has a Diesel and Adblue tank  located by the driver's door. Check the fuel level on the cockpit dashboard and use the car keys to open and close the diesel tank. Under the diesel tank, you will find the AdBlue tank, which is easily opened by rotating the blue lid to the right.

FAQs & Troubleshooting Guide

Question/Issue	What to do
Which type of fuel is required?	The Etrusco operates on diesel fuel.
The Adblue light is on - What should I do?	AdlBlue can be easily refilled at any gas station. The <u>Adblue filling cap</u>  is located below the fuel filling cap. You can use the <u>funnel</u>  to make it easier. Learn more about the <u>AbBlue</u>  .

16 Storage Area

In the driver/passenger back side of the van, you can find the storage compartment . To access from the exterior, you should use the small key you're given upon check-in.
Under the rear bed (from the interior), you have also access to more storage cabinets .

17

Spare Tire / Tire Repair Kit

During a road trip, a flat tire is a possibility. Please make sure the vehicle is well parked and visible, and contact our [customer support team](#) 📞.

Be prepared with:

- Pictures of the flat tire and, if visible, the affected area.
- Picture of the Spare Tire located under the vehicle.
- Repair kit, located under the rear seat (not mandatory)
- Your location (Google Maps) to speed up the search in the area.

Even if you know how to resolve the problem with the Repair Kit, we strongly recommend that you still contact [customer support team](#) 📞 as this is only a temporary solution.

Note: Please keep in mind that our team will diagnose the case. If a tire change or towing is required, it may take several hours for assistance to reach you, depending on availability and your current location. Flat tire service is not covered under any protection plan.

Before you Drop-off

All good things come to an end, but we hope to see you soon! Before you drop off your van, we ask you to take a moment to familiarise yourself with a few maintenance rules:

1. The chemical toilet and waste water tank must be emptied to avoid charges.
2. The interior of your van must be cleaned, and garbage must be thrown out.
3. Dishes must be washed and stored in the plastic box.
4. The fridge must be emptied and switched off.
5. The check-in and check-out fuel levels must be the same.
6. Dashboard Adblue Light should be off to avoid charges.

Support Contacts

This guide has all the information you need for your trip and helps you get the most out of your motorhome. If you run into any issues that are not covered in the guide, do not hesitate to contact us.

Need further assistance?

Our **On-Trip Support Team** can be easily reached through the Client Area, scanning the QR code located in the vehicle's windshield, where you'll find a **Contact Support** button routing you to our WhatsApp – this allows us to better diagnose & route your query to a specialized agent in order to provide a more efficient support.

Alternatively, you can access our WhatsApp through this [direct link](#) 💬. Please note: assistance is available via messages only, so send us a message to get started!

Enjoy the Ride!

Thank you for choosing Indie Campers for your adventure!

We wish you a safe and memorable road trip.
